Expanded Insurance Product Test Case Pack

Detailed positive, negative, boundary and calculation scenarios

This pack contains 75 detailed test cases across five additional domains. The original P&C Personal Auto baseline has 47 test cases in the separately shared files. Execution fields are blank.

Coverage summary

Domain	Requirements	Test cases
P&C — Homeowners / Property	5	15
P&C — Commercial Auto	5	15
Life Insurance — Term Life	5	15
Life Insurance — Whole Life	5	15
Life Insurance — Common Application, Underwriting and Servicing	5	15
P&C Personal Auto (existing baseline)	10	47

P&C — Homeowners / Property

HOME-REQ-01 — Capture property and applicant details

Test ID / Type	Scenario / Action	Expected Result
HOME-TC-01-01 Positive	Submit a complete owner-occupied application with year built 2005 and roof year 2020.	Application advances to eligibility and all entered values are retained.
HOME-TC-01-02 Negative	Omit property address and submit.	Submission is blocked and property address is flagged as required.
HOME-TC-01-03 Boundary	Enter year built as 1849 when configured minimum is 1850.	Validation fails and no quote is created.

HOME-REQ-02 — Validate property eligibility

Test ID / Type	Scenario / Action	Expected Result
HOME-TC-02-01 Positive	Submit an eligible owner-occupied home in a supported state and eligible protection class.	Eligibility passes to rating.
HOME-TC-02-02 Negative	Submit a property in a state absent from the configured supported-state list.	Quote is blocked with the configured unsupported-state reason code.
HOME-TC-02-03 Boundary	Submit a property exactly at the configured maximum eligible age.	Configured inclusive/exclusive boundary rule is applied and recorded.

HOME-REQ-03 — Select dwelling coverage and deductible

Test ID / Type	Scenario / Action	Expected Result
HOME-TC-03-01 Positive	Select dwelling limit $300,000 and $1,000 deductible from configured options.	Selections are saved and shown on the quote.
HOME-TC-03-02 Negative	Enter dwelling limit $275,000 when only $250,000 and $300,000 are configured.	Invalid limit is rejected with a field-level message.
HOME-TC-03-03 Negative	Submit a deductible of $2,500 when the configured maximum is $2,000.	Submission is blocked and no quote is saved.

HOME-REQ-04 — Calculate property premium and discounts

Test ID / Type	Scenario / Action	Expected Result
HOME-TC-04-01 Calculation	Use controlled factors whose expected term premium is $1,250.00 before tax/fees.	Term premium displays as $1,250.00; configured taxes and fees are separate line items.
HOME-TC-04-02 Boundary	Set quote start date to the effective date of rating version V2.	V2 is used for the quote.
HOME-TC-04-03 Positive	Rate identical inputs twice with the same rating version.	Both calculations return identical premium and line items.

HOME-REQ-05 — Bind policy and register property loss

Test ID / Type	Scenario / Action	Expected Result
HOME-TC-05-01 Positive	Bind a valid quote with terms accepted and payment method confirmed.	Unique policy number is created and issued coverages match the quote.
HOME-TC-05-02 Negative	Attempt to bind an expired quote.	Binding is blocked and recalculation is required.
HOME-TC-05-03 Negative	Register a loss dated one day before policy effective date.	FNOL registration is blocked with policy-not-in-force reason code.

P&C — Commercial Auto

CA-REQ-01 — Capture business and fleet details

Test ID / Type	Scenario / Action	Expected Result
CA-TC-01-01 Positive	Submit a commercial vehicle with all required business and vehicle details.	Application advances and vehicle is linked to the business.
CA-TC-01-02 Negative	Omit legal business name.	Submission is blocked and the missing field is identified.
CA-TC-01-03 Boundary	Enter a 16-character VIN.	VIN validation fails and no quote is created.

CA-REQ-02 — Validate commercial risk eligibility

Test ID / Type	Scenario / Action	Expected Result
CA-TC-02-01 Positive	Submit an eligible business with two eligible vehicles.	Risk proceeds to rating.
CA-TC-02-02 Negative	Submit a business class on the configured prohibited list.	Quote is blocked with the configured reason code.
CA-TC-02-03 Boundary	Submit a fleet one vehicle above the auto-quote threshold.	Application is routed to configured fleet underwriting/referral rather than rated as standard risk.

CA-REQ-03 — Select commercial auto coverages

Test ID / Type	Scenario / Action	Expected Result
CA-TC-03-01 Positive	Select $1,000,000 combined single limit and collision with $1,000 deductible.	Selections are saved exactly.
CA-TC-03-02 Negative	Enter a liability limit absent from configured options.	Invalid limit is rejected.
CA-TC-03-03 Negative	Submit comprehensive deductible while comprehensive is not selected.	Request is rejected and no deductible is stored for that coverage.

CA-REQ-04 — Rate fleet and apply credits

Test ID / Type	Scenario / Action	Expected Result
CA-TC-04-01 Calculation	Use controlled rating data with expected term premium $4,800.00 before taxes/fees.	Premium is $4,800.00 and taxes/fees are separate.
CA-TC-04-02 Calculation	Apply 7% fleet credit to eligible premium of $5,000.00.	Credit equals $350.00 and appears once.
CA-TC-04-03 Negative	Submit duplicate fleet-credit indicators.	Credit is applied no more than once.

CA-REQ-05 — Issue policy and endorse a vehicle

Test ID / Type	Scenario / Action	Expected Result
CA-TC-05-01 Positive	Bind a valid fleet quote and compare vehicles on issued policy with quote.	Policy and insured vehicles match quote.
CA-TC-05-02 Boundary	Add a vehicle effective halfway through the policy term.	A separate endorsement reference and prorated additional premium are recorded.
CA-TC-05-03 Negative	Repeat bind request with the same idempotency key.	No duplicate policy is created.

Life Insurance — Term Life

TERM-REQ-01 — Capture term-life application

Test ID / Type	Scenario / Action	Expected Result
TERM-TC-01-01 Positive	Submit complete application for $500,000 face amount and 20-year term.	Application is saved and advances to underwriting.
TERM-TC-01-02 Negative	Omit a required beneficiary allocation.	Submission is blocked and beneficiary details are flagged.
TERM-TC-01-03 Boundary	Select a term length not present in configured product options.	Invalid term is rejected.

TERM-REQ-02 — Apply life underwriting eligibility

Test ID / Type	Scenario / Action	Expected Result
TERM-TC-02-01 Positive	Submit applicant within configured age and face-amount limits with acceptable answers.	Application receives configured eligible/next-step status.
TERM-TC-02-02 Negative	Submit residence state not supported for this product.	Application is blocked with unsupported-residency reason.
TERM-TC-02-03 Boundary	Answer Yes to a configured mandatory medical referral question.	Application is referred to manual underwriting and not auto-approved.

TERM-REQ-03 — Calculate term premium

Test ID / Type	Scenario / Action	Expected Result
TERM-TC-03-01 Calculation	Use controlled rate data specifying monthly premium $42.50 for the test profile.	Monthly premium displays as $42.50 and payment mode is clear.
TERM-TC-03-02 Boundary	Start policy on the effective date of a new rating version.	The newly effective version is used.
TERM-TC-03-03 Positive	Recalculate unchanged inputs using the same version.	Premium and fees are identical.

TERM-REQ-04 — Validate beneficiaries

Test ID / Type	Scenario / Action	Expected Result
TERM-TC-04-01 Positive	Enter two primary beneficiaries with allocations of 60% and 40%.	Application accepts allocations totalling 100%.
TERM-TC-04-02 Negative	Enter allocations totalling 90%.	Submission is blocked with allocation-total error.
TERM-TC-04-03 Boundary	Enter allocations totalling 100.01%.	Submission is blocked; total must equal 100%.

TERM-REQ-05 — Issue policy and handle free-look

Test ID / Type	Scenario / Action	Expected Result
TERM-TC-05-01 Positive	Issue approved application after acceptance and payment confirmation.	Unique policy number is created and policy details match accepted terms.
TERM-TC-05-02 Negative	Attempt issue while underwriting status is Pending.	Issue is blocked.
TERM-TC-05-03 Boundary	Request cancellation on the last day of the configured 30-day free-look period.	Free-look cancellation is accepted and configured refund/status is recorded.

Life Insurance — Whole Life

WL-REQ-01 — Capture whole-life funding choices

Test ID / Type	Scenario / Action	Expected Result
WL-TC-01-01 Positive	Submit valid whole-life application with monthly mode and configured payment duration.	Application advances with funding choices retained.
WL-TC-01-02 Negative	Omit required payment duration.	Submission is blocked and missing duration is identified.
WL-TC-01-03 Negative	Select a paid-up option unavailable for the chosen product variant.	Option is rejected and not persisted.

WL-REQ-02 — Validate whole-life issue eligibility

Test ID / Type	Scenario / Action	Expected Result
WL-TC-02-01 Boundary	Submit at the configured minimum issue age.	Minimum-age boundary follows the configured inclusive rule.
WL-TC-02-02 Negative	Submit one day below the minimum issue age.	Application is blocked or referred per configured lower-bound rule.
WL-TC-02-03 Negative	Submit a prohibited residence state.	Application is blocked with configured reason code.

WL-REQ-03 — Calculate premium and guaranteed values

Test ID / Type	Scenario / Action	Expected Result
WL-TC-03-01 Calculation	Use controlled table specifying monthly premium $125.00 for test profile.	Monthly premium equals $125.00; guaranteed values are labelled.
WL-TC-03-02 Calculation	Switch monthly to annual premium mode.	Annual premium uses the configured modal factor.
WL-TC-03-03 Positive	Recalculate identical inputs with same product version.	Premium and guaranteed values are identical.

WL-REQ-04 — Validate cash value and policy loans

Test ID / Type	Scenario / Action	Expected Result
WL-TC-04-01 Positive	Retrieve configured guaranteed cash value for policy year 5.	Displayed value matches the configured schedule.
WL-TC-04-02 Boundary	Request loan equal to available loan amount.	Request passes limit validation and transaction is recorded.
WL-TC-04-03 Negative	Request loan one cent above available amount.	Request is blocked and no loan transaction is created.

WL-REQ-05 — Issue policy and collect premium

Test ID / Type	Scenario / Action	Expected Result
WL-TC-05-01 Positive	Issue approved application with terms accepted and payment confirmed.	Policy number is created and details match accepted application.
WL-TC-05-02 Negative	Attempt issue with outstanding underwriting requirements.	Issue is blocked.
WL-TC-05-03 Negative	Simulate declined initial premium payment.	Policy is not marked paid; payment failure and configured collection status are recorded.

Life Insurance — Common Application, Underwriting and Servicing

LIFE-REQ-01 — Create and track application

Test ID / Type	Scenario / Action	Expected Result
LIFE-TC-01-01 Positive	Create and save a complete application.	Unique application reference and configured initial status are created.
LIFE-TC-01-02 Positive	Retrieve application by its reference.	Correct application and audit history are returned.
LIFE-TC-01-03 Negative	Search using an unknown application reference.	Not-found response is returned without exposing another applicant's data.

LIFE-REQ-02 — Validate disclosures and evidence

Test ID / Type	Scenario / Action	Expected Result
LIFE-TC-02-01 Positive	Complete all required disclosures and record required evidence.	Application proceeds to underwriting decision.
LIFE-TC-02-02 Negative	Leave one mandatory disclosure unanswered.	Submission is blocked or status remains Incomplete.
LIFE-TC-02-03 Negative	Mark required medical report outstanding and attempt approval.	Approval is blocked and status remains Pending Evidence.

LIFE-REQ-03 — Manage underwriting decisions

Test ID / Type	Scenario / Action	Expected Result
LIFE-TC-03-01 Positive	Record Approve decision for a complete eligible application.	Status becomes Approved and issue eligibility is enabled.
LIFE-TC-03-02 Negative	Record Decline with configured reason code.	Status becomes Declined and reason is retained.
LIFE-TC-03-03 Negative	Trigger referral rule and attempt policy issue before review completion.	Issue is blocked while status remains Referred/Pending Review.

LIFE-REQ-04 — Generate documents and audit changes

Test ID / Type	Scenario / Action	Expected Result
LIFE-TC-04-01 Positive	Generate issued policy documents and compare face amount, premium, term and beneficiaries.	Documents match issued policy data.
LIFE-TC-04-02 Negative	Attempt protected policy-field update as unauthorised user.	Update is rejected and data remains unchanged.
LIFE-TC-04-03 Positive	Review audit history after a valid policy change.	Audit shows actor, timestamp and changed fields as configured.

LIFE-REQ-05 — Change beneficiaries and register claim notice

Test ID / Type	Scenario / Action	Expected Result
LIFE-TC-05-01 Positive	Change beneficiaries to allocations totalling 100%.	Change is saved with effective date and audit trail.
LIFE-TC-05-02 Negative	Submit beneficiary changes totalling 95%.	Change is blocked until allocation totals 100%.
LIFE-TC-05-03 Boundary	Register death notice dated before policy effective date.	Notice is blocked or referred according to configured in-force rule with reason recorded.
